1. Aplikacja pogodowa

Na zrzutach przedstawiono kod główny aplikacji wyświetlającej pogodę w wybranym mieście – wykonanej w języku Python, a także strukturę projektu wraz z plikiem requierements.txt służącym do definiowania listy bibliotek, niezbędnych do działania aplikacji. Do pobierania pogody użyte przeze mnie zostało darmowe API OpenWeatherMap.

```
app > 🔮 main.py > ...

2. Plik Dockerfile

5

```
◆ Dockerfile > ...

      FROM python:3.12-slim AS builder
      LABEL maintainer="Kateryna Zinchuk"
     WORKDIR /app
     COPY requirements.txt .
      RUN pip install --user -r requirements.txt
      COPY app ./app
     # Etap 2: Finalny obraz
      FROM python:3.12-slim
     WORKDIR /app
      COPY --from=builder /root/.local /root/.local
     COPY app ./app
     ENV PATH=/root/.local/bin:$PATH
     ENV PORT=8000
     EXPOSE 8000
      CMD ["uvicorn", "app.main:app", "--host", "0.0.0.0", "--port", "8000"]
27
```

3. Budowa i uruchomienie kontenera

Budujemy obraz:

```
PS C:\Users\PC\Desktop\zadanie1_docker> docker build -t zadanie1-app .

[+] Building 26.2s (13/13) FINISHED

=> => extracting sha256:e9ddbe7a005f6950194f9ec89ccfff2c86729491901f767d8b03f8062de3daf5

=> [builder 2/5] WORKDIR /app

=> [builder 3/5] COPY requirements.txt .

=> [builder 4/5] RUN pip install --user -r requirements.txt

=> [builder 5/5] COPY app ./app

=> [stage-1 3/4] COPY --from=builder /root/.local /root/.local

=> [stage-1 4/4] COPY app ./app

=> exporting to image

=> => exporting layers

=> writing image sha256:ff1528f31d75b89e9fe175804005f9771a321f50b32c0a9934eaeb1414d3bb83

=> naming to docker.io/library/zadanie1-app

View build details: docker-desktop://dashboard/build/desktop-linux/desktop-linux/ioaozvggfpq0l01yp91g8xg20
```

Uruchamiamy kontener poleceniem *docker run -d -p 8000:8000 --name* zadanie1-container -e

OPENWEATHER_API_KEY=31c59dd39bfbd8e0db669ff800577f7e

zadanie1-app – klucz API ustawiamy jako zmienną środowiskową

Pobieramy logi z kontenera:

PS C:\Users\PC\Desktop\zadanie1_docker> docker logs zadanie1-container

INFO: Started server process [1]

INFO: Waiting for application startup.

INFO:zadanie1:Data uruchomienia: 2025-04-27 22:57:54.635883
